

CONTAINERIZATION CLAUSE

Warranted that the cargo which is customarily shipped in containers must be shipped in containers only. However, due to any unavoidable circumstances if such is not the case then the coverage would be subject to agreement with the underwriters prior to the sail of the vessel. All losses occurring due to inappropriate loading, stowage and stacking of the cargo onboard are hereby excluded from the cover unless these operations are supervised by Lloyd's approved surveyor (at the insured's cost) and all recommendations made by them are fully complied with. The loading, stowage and stacking approved by the surveyors should persist during the entire journey.
